Hi Erica,

We are only conducting water sampling at this time. I understand that some of the material has deposited in the Animas by Durango. We will likely conduct some level of sediment sampling in the coming weeks but those details are still being worked out.

Thank you. Will they accept sediment and water column samples? We plan to collect with our regular bottles used for our state lab. We plan to mail our first samples from Salt Lake City on Monday morning. Samples later in the week will be shipped from fed ex in Moab, Utah.

Doug and Erica,

The contacts at the Test America Savannah lab are Sheila Hoffman
Sheila.Hoffman@testamericainc.com (Project Manager – not working this weekend)
and Bernie Siemens Bernadine.Siemens@testamericainc.com.

I will notify them that your samples are coming and they should be included on Region

8's PO. There is a standard sheet we are including in all shipped coolers that I will send shortly. The main priority right now is coordinating shipping from the site to Savannah. When there is a plan in place for shipping, I'll make sure you are able to follow the same procedures.

Please let me know if you have any questions so far. I'll keep you posted with all updates.

Thanks,

Moir Pryhoda
